

### Annual maintenance requirements for HIP boot brushing stations:

- At a minimum, clean the boot brush signage and replace worn bristles as needed.
  - Boot brush replacements run about \$20+ shipping from the manufacturer.
    - <https://www.best-exfab.com/mustard.html>
- Remove and properly dispose of the dirt mound that will accumulate under the station.
  - Host sites can add a large, shallow box at the base of the sign filled with gravel to help keep the area clean and dry. Gravel should be replaced as needed.
- Remove and properly dispose of weeds that grow around the boot brush station.
- Fix any broken parts, tighten loose screws and simply keep the station sturdy and kept up.
